

ORM – MIGRATIONS

```
'migrations_configuration' => [  
    'orm_default' => [  
        'directory' => __DIR__ . '/../src/Migrations',  
        'name'      => 'Doctrine Database Migrations',  
        'namespace' => 'DoctrineORMModule\Migrations',  
        'table'     => 'migrations',  
        'column'    => 'version',  
    ],  
],
```

ORM – ENTITY

```
/**
 * @ORM\Table(name="posts")
 * @ORM\Entity(repositoryClass="\Application\Repository\PostRepository")
 */
class Post
{
    /**
     * @ORM\Column(name="id", type="integer", nullable=false)
     * @ORM\Id
     * @ORM\GeneratedValue(strategy="IDENTITY")
     */
    private $id;

    /**
     * @ORM\Column(name="name", type="string", length=45, nullable=true)
     */
    private $name;
```
