

ORM – FIXTURE

```
class FaceFixture extends AbstractFixture
{
    /**
     * @param ObjectManager $manager
     */
    public function load(ObjectManager $manager)
    {
        $post = new Post();
        $post->setName('Test 1');
        $post->setDescription('Test Post 1');
        $manager->persist($post);
        $manager->flush();
    }
}
```

ORM – SETUP

```
class PostRepositoryTest extends AbstractControllerTestCase
{
    public function setUp() : void
    {
        $configOverrides = [];
        $this->setApplicationConfig(ArrayUtils::merge(
            include __DIR__ . '/../../../../config/application.config.php',
            $configOverrides
        ));

        $this->loadFixtures(__DIR__ . '/Fixtures');

        parent::setUp();
    }
}
```
